# 1. Relative Products

S123 lock body

# 2. Product Appearance

2.1 Lock body Material: ABS

Size: 123\*59\*19.5mm

2.2 Front panel

Material: PC+Acrylic Size: 65\*65\*13mm

2.3 Lock hook
Suitable lock hook for installation

2.4 Screws
Suitable screws for different material cabinets
(wooden/metal) and different door thickness.

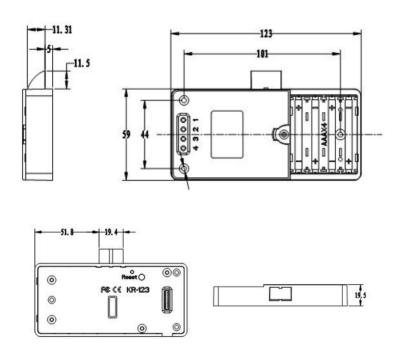

2.5 External power supply

With external battery box and power adaptor to work with lock body or front panel for emergency power supply.

Lock Hook

# 4. Product Functions

# 4.1 Parameters

Material	ABS for lock body, Acrylic & PC for panel
Power consumption	Load current <210mA
	Locked rotor current <600mA
	Standby current <20mA
	Static current <30uA
Working voltage	DC6V(4*AAA 1.5V)
	Batteries can standby for around 1 year
Working environment	Working temperature $-20^{\circ}\text{C} \sim +65^{\circ}\text{C}$
	Working humidity 10% ~ 90%RH
Anti-static	Air static 15KV
	Touch static 8KV
Unlocking times	New batteries: >19,000 times(continuously)
	Batteries in low voltage: >1,000 times(continuously)

# 4.2 Functions & Features

Functions	Features
Sound prompt	Lock will prompt with sound when press keys, input
	correct/wrong code, battery is in low voltage
Light prompt	Green: correct operation
	Red: wrong operation
	Blue: low voltage
	White or light blue: standby status

-	
	Low voltage alarm:  1. When battery's voltage is lower than 4.5V, light will shine
Alarm functions	in blue and lock sounds "di di" for 8 times on every opening to
	remind user changing new batteries.
	2. When voltage is less than 4V, lock can't be locked after unlocking until change new batteries.
	3. Lock can work normally 1000 times after low voltage
	warning.
	Locking protection:
	Input wrong code/card, lock will shine in red twice and prompt
	with "di di". Wrong for 5 times continuously, lock will be
	unavailable for 5mins.
	During unavailable period:
	1. Use manager code can make it available.
